

FORESTHILL ROAD BRIDGE SEISMIC

PROJECT NO. 2788

SUPERVISORIAL DISTRICT 5

- VICINITY MAP -

- VIEW OF BRIDGE FROM THE EAST SIDE OF THE CANYON -

PROJECT DESCRIPTION

Certain structural features of all bridges in California may be susceptible to damage or failure in an extreme seismic event. This project will analyze how this bridge responds to the maximum credible earthquake, and determine if any part of the structure should be retrofitted to insure it retains its structural integrity during and after an earthquake.
